4 CREDIT SUMMER COURSE STONEHILL COLLEGE COURSE DESCRIPTION:

Students will learn and master GPR (ground penetrating radar), metal detection, photogrammetry, 3D scanning, and mapping field methodology at Butts Hill Fort in Portsmouth, RI. National Historic Landmark. Students will be taught best archaeological practice, ethics and community outreach along with CRM (cultural resource management) at this National Historic Landmark. Lab component education in intake, cleaning, cataloguing, interpretation and analyses techniques. Research questions will follow the battle between French, U.S., and Hessian forces, fort construction and use, and lifeways of occupants (Northern and Southern Batteries). Students will also visit the Navy College and tour local battlefields and forts. We will seek to understand both African diaspora or African American and Native American views during this field school and will be visiting diaspora sites and Native American museums.

Contact the Uhl Lab for an application, auhl@stonehill.edu

We encourage students who are women, minorities, have a disability to apply. Limited partial scholarships possible, please inquire.
